JAFORD · Technical profile

Battery Binders

AL-3001A

Binders for battery electrode development.

Catalog information

Model	AL-3001A
Supplier designation	A&L
Application	Negative-electrode binder

Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.

Reference material class	Aqueous styrene-butadiene rubber binder
Reference application	Lithium-ion negative electrodes
Applicability	Research example; not an AL-3001A formulation or performance specification
