JAFORD · Technical profile

Cathode Electrodes

P2 — 7.5 × 5.4 cm, double-sided

NFPP and P2 cathode electrodes for sodium-ion research.

Catalog information

Dimensions	7.5 × 5.4 cm
Coating sides	Double-sided

Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.

Reference material class	Sodium-ion research electrodes
Applicability	General reference only; existing P2 dimensions remain catalog facts

Reviewed: 2026-10-10

Areal capacity and mass loading are separate quantities; one-sided and two-sided values use different bases.

Catalog facts: owner-supplied JAFORD product and capability brief. A technical profile is not a batch certificate, safety data sheet or measured performance report.
