JAFORD · Technical profile

CVD silicon–carbon anode powder

Spherical, secondary carbon coating

Silicon–carbon powder for anode research, including spherical material with a secondary carbon coating.

Catalog information

Morphology / coating	Spherical; secondary carbon coating

Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.

Reference product	LIB-SC450B
Reference material	Silicon-carbon anode composite powder
Applicability	Comparable composite; not confirmation of the JAFORD CVD route or coating
