JAFORD · Technical profile

Electrochemical Workstation

CHI760F

Bipotentiostat / electrochemical analysis

Catalog information

Model	CHI760F

Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.

Series	700F
Potential control	+/-10 V for both channels
Continuous current	+/-250 mA (sum of the two channels)
AC impedance	Included; 0.00001 Hz to 3 MHz
Galvanostat	Included
