JAFORD · Technical profile

Electrolyte

NFM-compatible

Electrolytes for battery research, supplied by model and compatible chemistry.

Catalog information

Application	NFM sodium-ion development

Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.

Reference product	MTI SBE-EDE111
Reference composition	1.0 M NaPF6 in EC:DMC:EMC = 1:1:1
Applicability	Analog only; not the formulation of QMS029D, XYSS-DGHYKJ118 or the NFM-compatible option
