JAFORD · Technical profile

EVE LF100LA prismatic cell

LF100LA

Prismatic battery cell identified by the EVE LF100LA model. Electrical, mechanical and handling parameters must follow the formal specification.

Catalog information

Manufacturer designation	EVE
Model	LF100LA
Format	Prismatic

Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.

Published model	LF100LA
Reference chemistry	Prismatic lithium iron phosphate
Reference nominal voltage	3.2 V
Applicability	Follow the approved datasheet for the supplied cell revision; no cycle-life or capacity guarantee is inferred
