JAFORD · Technical profile

# Catalyst-coated membranes (CCM)

## Catalyst-coated membranes (CCM)

Catalyst-coated membranes combine a membrane with catalyst layers applied directly to its surfaces. They support electrode and cell development where membrane selection and catalyst-layer design need to be considered together.

## Catalog information

| | |
|---|---|
| Type | Catalyst-coated membranes (CCM) |
| Application / scope | Catalyst-coated membranes combine a membrane with catalyst layers applied directly to its surfaces. They support electrode and cell development where membrane selection and catalyst-layer design need to be considered together. |

## Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.
