JAFORD · Technical profile

Flow-field plates

Flow-field plates

Flow-field plates for reactant distribution and cell assembly in fuel-cell and electrolyzer development. Plate material, channel pattern and dimensions are matched to the cell configuration.

Catalog information

Type	Flow-field plates
Application / scope	Flow-field plates for reactant distribution and cell assembly in fuel-cell and electrolyzer development. Plate material, channel pattern and dimensions are matched to the cell configuration.

Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.

Reference component	Graphite flow-field plates
Reference role	Reactant distribution in cell hardware
