JAFORD · Technical profile

2,000 mL glass reaction assembly

2,000 mL

Laboratory glass reaction assembly with a volume of 2,000 mL.

Catalog information

Volume	2,000 mL

Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.

Reference construction	Borosilicate glass 3.3
Reference applications	Synthesis, polymerization and crystallization
