JAFORD · Technical profile

Hard Carbon

Resin-Derived Hard Carbon

Hard-carbon anode materials for sodium-ion battery research.

Catalog information

Feedstock type	Resin-derived
Application	Sodium-ion battery anode research

Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.

Reference material	SIB-BHC300 hard-carbon anode powder
Reference application	Sodium-ion anode research
