JAFORD · Technical profile

NFPP cathode powder

Rate-oriented NFPP

NFPP powder for sodium-ion research and electrode processing, including a rate-oriented material option.

Catalog information

Material	NFPP

Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.

Reference chemistry	Na4Fe3(PO4)2P2O7 (NFPP)
Reference application	Sodium-ion cathode research
