JAFORD · Technical profile

Research pouch cells

Sodium-ion — dry cell

Existing sodium-ion and lithium-ion platforms for R&D. Select dry cells or electrolyte-filled, formed cells; platform suitability is reviewed with your requirements.

Catalog information

Type	Sodium-ion — dry cell
Application / scope	Existing sodium-ion and lithium-ion platforms for R&D. Select dry cells or electrolyte-filled, formed cells; platform suitability is reviewed with your requirements.

Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.

Reference use	Sodium-ion cell research
Applicability	General research-material reference; no capacity or cell construction is inferred
