JAFORD · Technical profile

Carbonization & activation

Carbonization & activation

We connect your lab-scale carbon work with larger furnaces, activation equipment and processing experience to develop larger batches and validate the resulting carbon structure and properties.

Catalog information

Type	Carbonization & activation
Application / scope	We connect your lab-scale carbon work with larger furnaces, activation equipment and processing experience to develop larger batches and validate the resulting carbon structure and properties.

Development / testing scope

Resin carbonization and alkali activation.

Steam or CO_2 activation routes assessed against feedstock and partner-facility conditions.

Catalog facts: owner-supplied JAFORD product and capability brief. A technical profile is not a batch certificate, safety data sheet or measured performance report.
