JAFORD · Technical profile

Electrode processing

Electrode processing

We connect your materials with slurry, roll-to-roll coating and finishing expertise to advance lab electrodes toward square-metre and larger pilot coating trials, validating uniformity and performance as scale increases.

Catalog information

Type	Electrode processing
Application / scope	We connect your materials with slurry, roll-to-roll coating and finishing expertise to advance lab electrodes toward square-metre and larger pilot coating trials, validating uniformity and performance as scale increases.

Development / testing scope

Slurry and coating coordination, calendaring and cutting.

NFPP, P2, layered-oxide and hard-carbon systems reviewed individually.

Catalog facts: owner-supplied JAFORD product and capability brief. A technical profile is not a batch certificate, safety data sheet or measured performance report.

Reference revision: 2026-10-10 · service-electrode-processing-0
