JAFORD · Technical profile

Functional polymers

Polyethylene glycol (PEG)

Hydrophilic modifiers, functional derivatives and polymer blends

Catalog information

Material / type	Polyethylene glycol (PEG)
Application	Hydrophilic modifiers, functional derivatives and polymer blends

Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.

Polymer class	Polyether
CAS identity	25322-68-3
