JAFORD · Technical profile

Functional polymers

Polyaniline (PANI)

Conducting coatings and electrode-material research

Catalog information

Material / type	Polyaniline (PANI)
Application	Conducting coatings and electrode-material research

Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.

Polymer class	Conjugated polymer
Reference form	Emeraldine base; conductivity depends on doping

Source: Sigma-Aldrich — polyaniline emeraldine base
