JAFORD · Technical profile

Ligands

Trimesic acid — ligands for Cu-BTC frameworks

Carboxylate linker for HKUST-1 development

Catalog information

Material / type	Trimesic acid — ligands for Cu-BTC frameworks
Application	Carboxylate linker for HKUST-1 development

Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.

Donor group	Carboxylate
Linker type	Tricarboxylic acid
