JAFORD · Technical profile

Ligands

2,2'-Bipyridine — ligands for coordination catalysts

Chelating ligand for metal complexes and catalysis research

Catalog information

Material / type	2,2'-Bipyridine — ligands for coordination catalysts
Application	Chelating ligand for metal complexes and catalysis research

Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.

Donor group	Two pyridyl nitrogen atoms
CAS identity	366-18-7

Source: Sigma-Aldrich — 2,2'-bipyridine ligand
