JAFORD · Technical profile

Polymer & resin synthesis

Polymer & resin synthesis

We bring together specialist synthesis facilities and process experience to advance your polymer or resin from milligram-scale lab work to gram- and kilogram-scale development, with characterization alongside scale-up.

Catalog information

Type	Polymer & resin synthesis
Application / scope	We bring together specialist synthesis facilities and process experience to advance your polymer or resin from milligram-scale lab work to gram- and kilogram-scale development, with characterization alongside scale-up.

Development / testing scope

PEG derivatives, cyclodextrin-related polymers and resin precursors.

Repeat synthesis and agreed batch preparation through partner laboratories and factories.

Catalog facts: owner-supplied JAFORD product and capability brief. A technical profile is not a batch certificate, safety data sheet or measured performance report.
