JAFORD · Technical profile

Research procurement

Research procurement

We connect your research team with materials, equipment and specialist suppliers so you can move from lab experiments to larger-scale development with the right technical resources.

Catalog information

Type	Research procurement
Application / scope	We connect your research team with materials, equipment and specialist suppliers so you can move from lab experiments to larger-scale development with the right technical resources.

Development / testing scope

Material selection, small-batch procurement and equipment sourcing.

Coordination of custom molds, heating mantles and related accessories.

Catalog facts: owner-supplied JAFORD product and capability brief. A technical profile is not a batch certificate, safety data sheet or measured performance report.
