JAFORD · Technical profile

Resins

Ion-exchange resins

Ion separation, purification and functional membrane-composite research

Catalog information

Material / type	Ion-exchange resins
Application	Ion separation, purification and functional membrane-composite research

Reference specification

Published reference information, not JAFORD batch measurements or guaranteed acceptance limits. Analog specifications do not establish the formulation or performance of a different model.

Reference type	Cross-linked polymer with ion-exchange groups
Reference functionality	Strong-base anion exchange

Source: Sigma-Aldrich — strongly basic anion-exchange resin
