JAFORD · Technical profile

Short-stack testing

Short-stack testing

Take fuel-cell or electrolyzer validation from individual cells into a short stack. Interfaces, operating conditions and measurement scope are reviewed with partner facilities to assess performance and stability.

Catalog information

Type	Short-stack testing
Application / scope	Take fuel-cell or electrolyzer validation from individual cells into a short stack. Interfaces, operating conditions and measurement scope are reviewed with partner facilities to assess performance and stability.

Catalog facts: owner-supplied JAFORD product and capability brief. A technical profile is not a batch certificate, safety data sheet or measured performance report.
