Fuel-cell & electrolyzer stack testing

Fuel-cell & electrolyzer stack testing

We connect fuel-cell and electrolyzer development with suitable short-stack and full-stack test facilities to evaluate performance as you move from individual cells to larger systems.

Catalog information

Type	Fuel-cell & electrolyzer stack testing
Application / scope	We connect fuel-cell and electrolyzer development with suitable short-stack and full-stack test facilities to evaluate performance as you move from individual cells to larger systems.

Development / testing scope

Review of stack configuration, interfaces and operating envelope.

Agreed performance, operating stability and system-level validation protocols.

Catalog facts: owner-supplied JAFORD product and capability brief. A technical profile is not a batch certificate, safety data sheet or measured performance report.
