JAFORD · Technical profile

Synthesis scale-up & process replication

Synthesis scale-up & process replication

We connect your lab-scale material or catalyst synthesis with partner equipment and process expertise to develop repeatable gram- and kilogram-scale processes and validate the material as scale increases.

Catalog information

Type	Synthesis scale-up & process replication
Application / scope	We connect your lab-scale material or catalyst synthesis with partner equipment and process expertise to develop repeatable gram- and kilogram-scale processes and validate the material as scale increases.

Development / testing scope

Raw-material procurement and SOP replication.

Process iteration and planned batch delivery with partner facilities.

Catalog facts: owner-supplied JAFORD product and capability brief. A technical profile is not a batch certificate, safety data sheet or measured performance report.
