JAFORD · Technical profile

X-ray diffraction (XRD)

X-ray diffraction (XRD)

Investigate crystalline structure and phase composition using X-ray diffraction through specialist laboratories. Sample requirements, measurement conditions and the scope of phase analysis are selected around the material and research objective.

Catalog information

Type	X-ray diffraction (XRD)
Application / scope	Investigate crystalline structure and phase composition using X-ray diffraction through specialist laboratories. Sample requirements, measurement conditions and the scope of phase analysis are selected around the material and research objective.

Catalog facts: owner-supplied JAFORD product and capability brief. A technical profile is not a batch certificate, safety data sheet or measured performance report.
